

## BIAS STRIP CURVES ~ Supply List © 2015 Sherri Lynn Wood ~ daintytime.net

### Tools & Equipment:

- Sewing Machine with extension chord
- **Sharp** sewing scissors – We will be using scissors a lot in this workshop – make sure to bring a good quality 7”- 8” pair of sewing shears with a sharp edge.
- Hand sewing needles –thimble optional – just in case
- Straight pins
- Tailor’s chalk
- Medium gray spool of thread
- Rotary cutter and self-healing mat.

### Materials:

- Two to three  $\frac{3}{4}$  yard selvage-to-selvage cuts of different valued fabrics – prints and/or solids. You will cut bias strips from this to share with the class.
- Several large pieces of fabric for your curve shapes. Fat quarters, 18” x 22” work well as the minimum size. You may want to go larger.
- Have a range of prints and solids, hues and values on hand to support your creative flow. Do not come with a coordinated color scheme. However don’t fret -- whatever you bring – will be enough to make do with.

If you miss the beginning of class I will be unable to bring you up to speed. If you need to leave a little early that is ok.

Classroom setup: ironing stations for every 4 students. Basic sewing Machine and table for teacher demo.
