

Intuitive Piecing with Solids

When using solids, the emphasis is put on the shape of each piece of fabric. The lines and shapes become the focus of the quilt rather than the print of a fabric. The mood of the quilt is set by your piecing and color choice, not by a style of print.

Working with free-form, improvisational construction, students will create their own, original quilts using easy to learn design concepts and techniques. This design class is good for the beginning and advanced, traditional and art quilter. Come and join the fun as Lynn shows you easy methods for creating your own original quilts.

Materials:

Sewing machine and basic sewing kit including good sewing shears. Rotary cutter, mat and rulers. (a 6"X12", or 6"X24" is suggested)

Fabric: You can work with predominantly lights, mid-tones or darks. You can work with bright colors or dull colors. Regardless of your predominant tone, include some accent colors. Bring color ideas you like to work with.

Fabric amount: For a 1 or 2 day class bring a total of 3 yards of fabric, and for a 4 or 5 day class, bring a total of 5 yards. Scraps and small pieces are fine to add to the mix. (These are approximate amounts of fabric. You know how you like to sew, and how much fabric's you like to have available).
